

Oxi 5 PB TE

Mixture of microelements with copper, boron and manganese, enriched with magnesium

Oxychloride copper 5%

Fertilizer

Aspetto:

Fine wettable dust

Color:

Blue/green

For copper, boron and manganese deficiency. Enriched with magnesium.

Being magnesium essential for photosynthesis it is present in the development of some enzymes and pigments. In case of deficiency plants show wide chlorosis in the oldest leaves, defoliation, less production of flowers and fruit. Peculiar symptoms are for instance drying of grape rachis and apple physiopathies.

It enhances photosynthesis, colour of leaves and fruit and their production levels.

Special high performing formulation with rapid spread providing a complete crop nourishment thanks to the presence of mesoelements and microelements.

Warning:

Do not use when flowering. To be used in the freshest hours of the day. Do not mix with products with alkaline reaction. Before mixing it with phytosanitariaries or other fertilizers make a compatibility test. No direct mixing with amino acids, humic acids and products with acid reaction.
