B&G Tris

Fluid mixture of microelements with oxychloride copper, sulphate and hydroxide and manganese

With copper salt

EU Fertilizer

Aspetto: Water

Color: Blue

Foliar fertilizer developed for copper deficiency and enriched with manganese. It contains copper oxychloride, sulphate and hydroxide essential for a synergic action against copper deficiency.

Its flowable formulation enables an easy dustless application. It increases quantity crop yields and proteins useful to obtain better quality of crops.

Warning:

Shake well before its application. Do not use when flowering. To be used in the freshest hours of the day. Do not mix with products with alkaline reaction. Before mixing it with phytosanitaries or other fertilizers make a compatibility test. No direct mixing with amino acids, humic acids and organic products. Product is stable at normal temperature and pressure. Storage temperature between 5°C and 40°C. Not combustible. To be used only when strictly required.

(i) Properties
Density, 25°C 1,40-1,50 (g/ml)
Copper (Cu) total 20 (% p/p)
Water-soluble manganese (Mn) 0,5 (% p/p)
pH dispersion 1% 5,5-6,5
Water solubility Aqueous suspension

Packages
Code:FLOWTRIS1
1 kg – bottle (box of 12 pcs) – Pallet:600 kg
Code:FLOWTRIS5
5 kg – tank – Pallet:630 kg
Code:FLOWTRIS10
10 kg – tank – Pallet:500 kg
