## Zolfo 51 S Flow SC Sulphur water suspension

Sulphur 51%

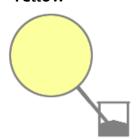

## Corrective

Aspetto:

Water suspension

Color:

Yellow

Corrective in suspension for sulphur deficiency and important element for protein synthesis. Used for soil correction of field, vegetable and fruit crops.

Its flowable formulation enables an easy dustless application and better mixeability with other products.

Having a corrective effect on the soil, it lowers pH and improves the availability of its nutrient elements.

It enhances quantity and quality crop yields integrating sulphur in case of deficiency and increases proteins useful to obtain better quality of crops.

Highly adhesive and resistant to rain washout.

## Warning:

Shake well before its application. Do not use when flowering. To be used in the freshest hours of the day. Do not mix with products with alkaline reaction. Before mixing it with phytosanitaries or other fertilizers make a compatibility test. No direct mixing with amino acids, humic acids and organic products. Product is stable at normal temperature and pressure. Storage temperature between 5°C and 40°C. Not combustible. To be used only when strictly required.

(j) Properties	
Total sulphur (S) 51% (%p/p)	
pH dispersion 1% 5,5 - 6,5	
Density, 25°C 1,45 - 1,50 (g/ml)	
Water solubility Aqueous suspension	

## Foliar fertilization Fruit trees (apple, pear, peach, cherry, apricot, plum) 150-350 ml in 100 liters of water Grapes 250-350 ml in 100 liters of water Olive 250-350 ml in 100 liters of water Open field (beet, cereals, rice, tobacco), flower crops 300-500 ml in 100 liters of water

Vegetable crops, strawberry, fennel, ornamental crops 200–300 ml in 100 liters of water
