

Flow Mix 8

Fluid mixture of microelements with oxychloride copper and sulphate with manganese and boron, enriched with sulphur

Enriched with boron

Fertilizer

Aspetto:

Water suspension

Color:

Blue

Foliar fertilizer for copper and sulphur deficiency, enriched with boron and manganese.

It contains copper oxychloride and sulphate for a synergic action against copper deficiency.

Sulphur allows the key action of crop proteic synthesis.

Its flowable formulation enables an easy dustless application.

It enhances quantity of crop yields and proteins useful to obtain better quality of crops.

Warning:

Shake well before its application. Do not use when flowering. To be used in the freshest hours of the day. Do not mix with products with alkaline reaction. Before mixing it with phytosanitariaries or other fertilizers make a compatibility test. No direct mixing with amino acids, humic acids and organic products. Product is stable at normal temperature and pressure. Storage temperature between 5°C and 40°C. Not combustible. To be used only when strictly required.
