

B&G Borlanda NCK

Organic nitrogen fertilizer for foliar and fertirrigation. Flowable wine pomace

Organic nitrogen fertilizer

Aspetto:

Liquid

Color:

Dark brown

Allowed in organic agriculture.

Raw materials: wine pomace and its extracts, beet molasses. No wine pomace obtained with smelling salts.

Rich in aminoacid and natural vegetal proteins and bioactivators which stimulate enzymatic processes and the development of agricultural microfauna and microflora.

Rich in microelements and macroelements which allow its foliar and root absorption in the plant.

The presence of potassium, being immediately available, makes B&G Borlanda NCK a key product, increasing sugar grade, fruit colours and enhancing sizes and uniformity.

The presence of organic nitrogen, gradually released, improves the vegetative development of the plant.

Efficient antistress, it contributes to the absorption of other fertilizers. If used in fertigation it improves the activity of soil microflora.

Easily usable for both fertigation and foliar treatment thanks to its liquid formulation.

Warning:

Do not use when flowering.

Properties
Density 25°C 1,20-1,26 (g/ml)
pH solution as it is 6,5-9,5
Water solubility Miscible in aqueous solutions
Organic nitrogen (N) 2,8 (% p/p)
Organic carbon (C) 13 (% p/p)
Water-soluble potassium oxide (K ₂ O) 6 (% p/p)
Viscosity min 50 (mPa,20°C)
Dry substance 50-56 (% p/p)

Packages
Code:BNCK25 20 kg -tank - Pallet:600 kg
Code:BNCK1000 IBC - Pallet:1250 kg
Code:BNCKAB 30000 kg - truck tanker

Foliar
All crops 250-300 g/hl water

Fertigation
Fruit trees and other crops 20-30 kg/ha in 2-3 interventi dopo la fioritura, in funzione delle esigenze colters ofurali.
Vegetable and flower crops 2-3 kg/1.000 mq dal post trapianto con interventi regolari ogni 15-20 gg
