

# Micro-E

## Water solution of chelated elements with EDTA

### Integrator

Aspetto:

Liquid

Color:

Dark green

Micro-E liquid integrator is a water solution of microelements such as:

- iron
- zinc
- manganese
- copper
- sulphur
- magnesium

In case of microelement deficiency it provides a global supply of nutrients which support the plant throughout growing and flowering.

#### Warning:

Shake well before its application. Do not use when flowering. Do not mix with products with alkaline reaction. Before mixing it with phytosanitaries or other fertilizers make a compatibility test. No direct mixing with amino acids, humic acids and organic products. Product is stable at normal temperature and pressure. Storage temperature between 5°C and 40°C. Not combustible.

 Properties
Density, 25°C 1,10-1,20 (g/ml)
pH as it is 6,5-7,0
Water-soluble manganese (Mn) chelated with EDTA 0,015 (%p/p)
Water-soluble iron (Fe) chelated with EDTA 0,050 (%p/p)
Water-soluble zinc (Zn) chelated with EDTA 0,010 (%p/p)
Water-soluble copper (Cu) chelated with EDTA 0,050 (%p/p)
Total sulphur (S) 0,100 (%p/p)

 Packages
Code:MICRO-E1 1 kg - bottle (box of 12 pcs) - Pallet:600 kg
Code:MICRO-E5 5 kg - tank - Pallet:530 Kg
Code:MICRO-E10 10 kg - tank - Pallet:500 kg
Code:MICRO-IBC IBC - Pallet:1000 kg

 Foliar
<b>Fruit trees</b> 100-150 ml in 100 liters of water
<b>Grapes</b> 100-150 ml in 100 liters of water
<b>Vegetable and ornamental crops</b> 100-150 ml in 100 liters of water

 Radical fertilization
<b>Fruit trees</b> 3-8 kg/ha
<b>Grapes</b> 3-8 kg/ha
<b>Vegetable and ornamental crops</b> 3-8 kg/ha
